

Autoriza Trato Directo para la adquisición del servicio que se indica

**RESOLUCIÓN EXENTA N° 4190**

Santiago, 27 de julio de 2022

**VISTOS:**

Lo dispuesto en el Artículo 10º, Nº 5 del Decreto N° 250, de 2004 del Ministerio de Hacienda que aprueba el reglamento de la Ley N° 19.886 de Bases sobre Contratos Administrativos de Suministro y Prestación de Servicios; el Decreto N° 821 de julio de 2019 que modifica el Decreto N° 250; el artículo 20 de la ley N° 18.010; El decreto supremo N° 180 de 1987, del Ministerio de Hacienda; los Decretos Universitarios N°s. 1043 de 2022, 1261 de 2021 y 863 de 2022.

**CONSIDERANDO:**

1. Que, el Instituto de Nutrición y Tecnología de los Alimentos, Doctor Fernando Monckeberg Barros (INTA), en adelante INTA, es una institución dependiente de la Universidad de Chile, cuyos servicios y objetivos están orientados a la docencia, investigación y nutrición.
2. Que, en el marco de las labores investigativas realizadas por el Proyecto de Inserción U-Inicia de INTA, se hace necesario adquirir el servicio de publicación de artículo de investigación, titulado: "Antimicrobial multiresistant phenotypes of genetically diverse Pseudomonas spp. isolates associated with tomato plants in Chilean orchards", en revista "Horticulturae", con cargo al centro de costo 7271.
3. Que, revisado el catálogo de compras de productos y servicios a través del portal [www.mercadopublico.cl](http://www.mercadopublico.cl), se concluye que el servicio requerido no se encuentra disponible en el sistema de convenios marco de la Dirección de Compras y Contratación Pública.
4. Que, la revista "Horticulturae", aceptó la publicación del artículo suscrito por los profesionales: Pamela Córdova, Juan Pablo River-González, Victoria Rojas-Martínez, Pablo Villarreal, Alan Zamorano, Nicola Fiori, Daniel San Martín,

Francisca Vera, Eduardo Gálvez, Jaime Romero, Carolina Ilabaca-Díaz, Jaime Barrueto y Gastón Higuera.

5. Que, la revista “Horticulturae”, es de propiedad de la empresa de origen suizo **MDPI AG**, tal y como se desprende de la información disponible en el sitio web de esta última. (<https://www.mdpi.com/journals>).
6. Que, la edición y publicación de los artículos que se suscriben en cada edición de la revista “Horticulture”, son realizados por el proveedor de origen suizo **MDPI AG**, en el país de origen del mismo.
7. Que, según los motivos expuestos en carta con fecha 25/07/2022, suscrita por el profesional Sr. Gastón Higuera, el servicio requerido permitirá contribuir al conocimiento y el resguardo sobre todo en un tema tan delicado como lo es la resistencia a antibióticos y cobre, siendo la publicación científica una muestra de la excelencia académica del programa llevado a cabo por esta institución.
8. Que, en consideración de lo antes expuesto, la empresa de origen suizo **MDPI AG**, envió con fecha 22/07/2022, documento denominado “Invoice” N° 1793116, por la publicación del artículo referido.
9. Que, dado lo anterior, el Director de INTA, autoriza la adquisición del servicio de publicación de artículo de investigación titulado: “Antimicrobial multiresistant phenotypes of genetically diverse Pseudomonas spp. isolates associated with tomato plants in Chilean orchards”, en revista “Horticulturae”.
10. Que, debido a las características particulares de la contratación y a que la empresa que provee el servicio requerido es extranjera, se hace imposible para esta entidad efectuar el proceso de compra a través del portal electrónico de la Dirección de Compras y Contratación Pública, debiendo gestionarse según lo dispuesto en el artículo 62º N° 6 del Decreto N° 250, de 2004 del Ministerio de Hacienda que aprueba el reglamento de la Ley N° 19.886, donde se establece que tratándose de las contrataciones de bienes y servicios, indicadas en el artículo 10 n° s 5 y 7, letras i) y k), efectuadas a proveedores extranjeros en que por razones de idioma, de sistema jurídico, de sistema económico o culturales, u otra de similar naturaleza, sea indispensable efectuar el procedimiento de contratación por fuera del Sistema de Información.
11. Lo dispuesto en el Artículo 10º N° 5, del Decreto N° 250, de 2004 del Ministerio de Hacienda que aprueba el reglamento de la Ley N° 19.886 de Bases sobre Contratos Administrativos de Suministro y Prestación de Servicios, que establece que procede el trato o contratación directa “Si se tratara de convenios de prestación de servicios a celebrar con personas jurídicas extranjeras que deban ejecutarse fuera del territorio nacional”, causal que se configura en la especie, tal como se desprende de los antecedentes señalados en los numerales anteriores.

**RESUELVO:**

1. Autorícese, bajo la modalidad de trato directo, la adquisición del servicio de publicación de artículo de investigación titulado: "Antimicrobial multiresistant phenotypes of genetically diverse Pseudomonas spp. isolates associated with tomato plants in Chilean orchards", en revista "Horticulturae", con el proveedor de origen suizo **MDPI AG**.
2. INTA de la Universidad de Chile, pagará la suma de **CHF 1.600,00.-** (Un mil, seiscientos frances suizos) los que serán pagados una vez tramitada la presente resolución y posterior a la recepción conforme de la factura, en la oficina de Contabilidad de INTA. El precio de divisa que se utilizará para la conversión corresponderá a su equivalente en pesos chilenos, según el tipo de cambio vendedor del día del pago, de acuerdo a lo certificado por el banco de la plaza, lo anterior según lo señalado en el artículo 20 de la Ley N°18.010.
3. Apruébense los Requerimientos y Condiciones de la Adquisición, que se entienden forman parte integrante de la presente resolución.
4. Impútese el gasto que irroge la presente Resolución al Título A, Subtítulo 2, ítem 2.6 del presupuesto vigente de esta Universidad.
5. Remítase la presente resolución a la Contraloría Interna de la Universidad de Chile para su control de legalidad.
6. Publíquese la presente Resolución en el portal [www.mercadopublico.cl](http://www.mercadopublico.cl) a más tardar dentro de las 24 horas siguientes a su dictación, de acuerdo a lo dispuesto por el artículo 57º letra d), del Decreto N° 250.

*Anótese, Publíquese y Comuníquese*

## **REQUERIMIENTOS Y CONDICIONES DE LA ADQUISICIÓN**

### **ADQUISICIÓN DE SERVICIO DE PUBLICACIÓN DE ARTICULO DE INVESTIGACIÓN INTA – UNIVERSIDAD DE CHILE**

#### **I. SERVICIO A ADQUIRIR**

En el marco de las labores investigativas realizadas por el Proyecto de Inserción U-Inicia de INTA, se hace necesario adquirir el servicio de publicación de artículo de investigación, titulado: "Antimicrobial multiresistant phenotypes of genetically diverse Pseudomonas spp. isolates associated with tomato plants in Chilean orchards", en revista "Horticulturae", con cargo al centro de costo 7271.

#### **II. PLAZO Y CONDICIONES PARA EL PAGO**

Dado a que el proveedor es extranjero y a las condiciones del servicio, el proveedor deberá publicar el artículo una vez aprobado el presente acto administrativo.

El proveedor deberá emitir previo a la publicación del artículo requerido, la factura o Invoice correspondiente, a fin de gestionar el pago.

La factura se cancelará una vez tramitada la resolución que aprueba la adquisición y posterior a la recepción de la misma en la oficina de Contabilidad de INTA. El pago se realizará mediante transferencia bancaria.

El precio de divisa que se utilizará para la conversión corresponderá a su equivalente en pesos chilenos, según el tipo de cambio vendedor del día del pago, de acuerdo a lo certificado por el banco de la plaza, lo anterior según lo señalado en el artículo 20 de la Ley N°18.010.

La facturación deberá indicar de manera obligatoria, y en el formato indicado, los siguientes datos:

Razón Social : Universidad de Chile  
R.U.T : 60.910.000-1  
Domicilio : El Líbano N° 5524, Macul  
Copia de Guía de Despacho (si corresponde)

Ante el incumplimiento de algunos de los puntos señalados, INTA podrá rechazar la recepción, siendo motivo suficiente para devolver el documento a la dirección de facturación, sin ser responsable de los costos tributarios asociados.

Para los proveedores que emitan facturas electrónicas, deberán remitirlas al correo [mvilo@inta.uchile.cl](mailto:mvilo@inta.uchile.cl).

Los proveedores no podrán suspender el despacho de los bienes o entrega de servicios contratados con INTA, cuando otro Centro, Instituto, Colegio, Facultad, etc., perteneciente a la Universidad de Chile, mantenga deudas con este.

La entrega de documentos tributarios debe realizarse exclusivamente en la oficina de contabilidad, ubicada en el tercer piso. INTA no se hará responsable por el pago de los costos asociados a facturas enviadas a otras direcciones.

### **III. VIGENCIA Y FORMALIZACION DE LA ADQUISICIÓN**

La adquisición se efectuará una vez aprobado el acto administrativo correspondiente y será de ejecución inmediata.

Debido a las características particulares de la adquisición y a que la empresa que provee el servicio requerido, es extranjero, la adquisición se formalizará una vez aprobado el presente acto administrativo y posterior al pago del servicio requerido.

La adquisición se regirá por: el presente pliego de condiciones y el documento denominado "Invoice N° 1793116", emitido por el proveedor y adjunto a los presentes términos de referencia.

### **IV. DATOS COMERCIALES DEL PROVEEDOR**

## Accepted Payment Methods

1. Online Payment by Credit Card in Swiss Francs (CHF)

Please visit <https://payment.mdpi.com/1731034> to pay by credit card. We accept payments in Swiss Francs (CHF) made through VISA, MasterCard, Maestro, American Express, Diners Club, Discover and China UnionPay.

2. Paypal in Swiss Francs (CHF)

Please visit <https://payment.mdpi.com/payment/paypal> and enter the payment details. Note that the fee for using Paypal is 5% of the invoiced amount.

3. Wire Transfer in Swiss Francs (CHF)

**Important: Please provide the Manuscript ID (horticulturae-1793116) when transferring the payment**

Payment in CHF must be made by wire transfer to the MDPI bank account. Banks fees must be paid by the customer for both payer and payee so that MDPI can receive the full invoiced amount.

**Abstract** The production of micropropagated plants in plant-tissue-culture laboratories and nurseries is the most important method for propagation of many economic plants. Micropropagation based on tissue-culture technology involves large-scale propagation, as it allows multiplication of a huge number of true-to-type propagules in a very [...] [Read more](#).

**Abstract** Broomrape (*Orobanche cernua* L.) is an obligate root parasitic weed that significantly reduces the qualitative and yield attributes of tomatoes globally. The efficient management of broomrape is challenging because of its complicated parasitic nature. Field trials were conducted to assess the

Accept (/accept\_cookies)

influence [...] [Read more](#).

**Abstract** Accurate surface defect extraction of apples is critical for their quality inspection and marketing purposes. Using multi-band images, this study proposes a detection method for apple surface defects with a combination of machine vision and deep learning. Five single bands, 460, 522, 660, [...]

**Abstract** Water stress negatively impacts the physiology of plants, affecting their growth and development. It is considered among the most important environmental factors responsible for reduced crop production. In this regard, biofertilizers may be considered significant for their reparative properties to increase stress tolerance.

**Abstract** Studying the changes of carotenoids in the taproot of carrots under salt treatment is helpful to probe the salt stress response mechanism of carrots. The carotenoid concentration and the expression profiles of 10 carotenoid-related genes were determined in two carrot cultivars with different [...] [Read more](#).

Santiago, 25 de julio 2022

Señores  
Contraloría Interna  
Universidad de Chile  
AT.: A quien corresponda

Junto con saludar, solicito a contraloría la autorización para realizar el pago en el extranjero a la revista científica Horticulturae, de nuestro recientemente aceptado Manuscrito ID: horticulturae-1793116 (adjunto certificado). Cuyo título es “Antimicrobial multiresistant phenotypes of genetically diverse *Pseudomonas spp.* isolates associated with tomato plants in Chilean orchards”

Esta publicación, es la finalización de varios años de estudio de la diversidad de bacterias del género *Pseudomonas* ambientales inocuas, así como fitopatógenas presentes en huertos nacionales. El objetivo principal fue determinar cómo estas bacterias que usualmente están presentes en ambientes agrícolas, resultaron ser multirresistentes a antibióticos y cobre, pudiendo considerarse como reservorios de resistencia así como un potencial riesgo para la salud humana. Los resultados fueron enviados, revisados y aceptados por la revista Suiza Horticulturae, que pertenece a Web of Science (WOS), y se encuentra dentro del cuartil uno (Q1) del área. El cuartil es un indicador que sirve para evaluar la importancia relativa de una revista dentro del total de revistas de su área, que se encuentre en Q1 significa que pertenece al 25% de las revistas más importante en agronomía a nivel mundial.

Consideramos que nuestro trabajo ha sido de alto impacto y se vio reflejado por la rápida aceptación, del mismo modo, esperamos contribuir al conocimiento y el resguardo sobre todo con un tema tan delicado como lo es la resistencia a antibióticos y cobre. Esta revista nos permitirá una mayor visualización y difusión en la comunidad científica a nivel internacional.

Finalmente, los costos de publicar en una revista de este prestigio es de CHF 1600,00 Francos Suizos ( \$1.556.545 valor de referencia del franco suizo a peso chileno al día 25 de julio 2022). Adjunto la Invoice. El pago de esta se efectuará a través de mi centro de costo N° 7271, que pertenece al Proyecto que llevo en curso U-Inicia (Vicerrectoría de Investigación de la Universidad de Chile).

Esperando tener una buena acogida se despide muy cordialmente

Gastón Higuera
